

Git history evidence

The images below shows Feature branches used for the work, with at least twelve atomic commits, each merged into main with `git merge --no-ff` so that the branch structure stays visible in the history.

```
PS C:\Users\User\IdeaProjects\Formative_Tracker\rekolt-tracker> git log --oneline --graph --all
* 04ba3a7 (HEAD -> main, origin/main, origin/HEAD) docs: Contains the evidence for objective 1
* 70e780d (tag: v1.0) Merge feat/obj6-Word-report into main
| \
| * b378c3d (origin/feat/obj6-Word-report, feat/obj6-Word-report) docs: Season Report generated
| * 6672a1d feat: Formatted to display properly
| * 66b4384 docs: Season Reported has been generated
| * 5887b57 feat: Formatted to produce a clean display
| * 7be9df3 feat: Formatted to produce a clean display
| * a695b0a feat: Linked season report generation into main
| * 9bae4b7 feat: Added closing section to season report
| * 39bc9c8 feat: Added member delivery details to report
| * 13a9df9 feat: Added basic Word season report generation
| * f0d65be feat: Remove POI after confirming it works
| * 449ef96 feat: Added feature to see if my POI is actually working
| * 6a3af54 chore: Added Apache POI dependency for Word document generation
| /
* 5907ba2 (tag: v0.5) Merge feat/obj5-abstraction into main
| \
| * 7ab5e58 (origin/feat/obj5-abstraction, feat/obj5-abstraction) docs: Added change log document
| * d066cd6 docs: Added design-v2 with updated Produce hierarchy
| * 17734b7 feat: Implemented feature to display all the produce's type multipliers
| * 11120ac feat: Implemented feature to display all the produce's type multipliers
| * c32d2d3 feat: Implemented feature to process list polymorphically
| * 3b04e2c feat: Implements feature to check if deliveryId is equal
| * 9858932 fix: Fixed bug
| * 74f2b6c feat: Added feature so that member can accumulate their own delivery
| * 1759ef7 feat: Linked Payable and Reportable to implement them in Member
| * 886727f feat: Formatted summaryLine string format
| * bbb9842 feat: Linked Payable and Repostable subclass to Delivery
| * 56d60fb feat: Added Summary subclass
| * 5081131 feat: Added Payable subclass
| * 13b28ca feat: Formatted end result
```

```
| * 13b28ca feat: Formatted end result
| * 266f83c feat: Connected the subclasses to Produce to construct
| * 1e5b6f4 fix: Fixed typing error of CashCropProduce
| * 4ec7e6a feat: Added CashCropProduce subclass
| * a72946a feat: Added PerishableProduce subclass
| * 1b3fce4 feat: Added CerealProduce feature
| * f23b994 feat: Added abstract methods to allow the subclasses to implement values
| /
* f9e191c (tag: v0.4) Merge feat/obj4-design into main
| \
| * 4be57ad (feat/obj4-design) docs:Added the on-paper design document
| /
* 7b1ab61 (tag: v0.3) Merge feat/obj3-collections into main
| \
| * 076bcb8 (origin/feat/obj3-collections, feat/obj3-collections) docs: Wrote collections rationale justifying each choice
| * fcdd39a feat: Added an Iterator-based removal of REJECT deliveries into a filtered copy
| * b904323 fix: Removed sample data after confirming it runs
| * 2bec4e6 feat: Added sample data to search by delivery id, handling not-found with Optional
| * aa08618 feat: Added sample to search by delivery id, handling not-found with Optional
| * db7533c feat: Added feature to search by delivery id, handling not-found with Optional
| * 39d1969 feat: Added feature to check top-five-by-value sorting using Comparable
| * 12d99fc feat: Added a feature to make Delivery Comparable, sorting highest net payable first
| * 44d2237 fix: Corrected import typo and wire seed deliveries through SeasonService
| * b0c666f fix: Fixed runningTotal and added to getPaymentPerMember()
| * e26206f feat: Added feature for holding ArrayList, Hashmaps, Hashset
| /
* f915f8d (tag: v0.2) fixed bugs
* 3f0b12b feat: Added a dozen sample deliveries
* f6e42bc fix: Fixed bugs
* b7c67f9 fix: Fixed bugs
* 914c4bf fix: Fixed bugs
* e4e3e20 fix: Fixed bugs
* 586d924 fix: Fixed bugs
* 7ee2940 fix: Fixed bugs
```

```
* 007e0de feat: Added a console menu which displays the receipt and weekly grid
* 3851b04 feat: Inputted function to check empty spaces
* 58bd985 fix: Fixed readmass function
* 8aa8e00 fix: Renamed price to produceservice
* 027b5c9 feat: Added InputValidator that loops till validated
* fc93fd1 fix: Fixed bugs
* e2e5ec1 feat: Added delivery class process function
* 1439c93 fix: Fixed bugs
* c2f8567 fix: Refined payment calculation output
* 0e3e737 feat: Created the modal class for price
* 2f5b3ad feat: Created the modal class for produce
* 98b85f3 feat: Implemented the enum for the Grade
* 2552140 feat: Implemented a model class for Member
* 422eefe feat: Implemented validation loop
* 63a82df feat: Formatted
* b8e2d60 fix: Fixed bugs
* 9affc94 feat: Formatted
* c2d92f9 feat: Implemented printing results
* dad80b8 feat: Implemented validation loops for grademultiplier
* 1f0114f feat: Implemented printing function
* 8c75e27 feat: Implemented calculation functions
* b63058c feat: Provided info needed for payment processing
* 82e0460 feat: Provided input for delivery processing
* 43b9349 chore: Fixed Maven project skeleton
* ded4805 Formatted
* 8c2b248 Fixed bug
* 7cfaff6 (tag: v0.1) Added print function
* 3c002db Implemented the payment rules
* 37fb92f Made variable declarations for delivery and payment information
* 499dbc0 Merge branch 'main' of https://github.com/Sadia-ALCHE/rekolt-tracker To merge our readme file with our current project content
|\
| * d19668c Rename project from 'revolt-tracker' to 'rekolt-tracker'
| * 5b9ccf7 Initial commit
* bb2c9b9 chore: Initiating my project
(END)
```
